

Badger Training Report

On Oct 26, at the Campbellsport Fire Dept we hosted an LP Training night with the WPGA/WiPERC. We had a little over 60 members attend

We will be looking into working with the Washington County Dive Team to train the Departments that are new to Ice/Water Rescue. If your department would like individual training, contact myself or Antonio and we will set something up.

There will be some Live burn training coming up in February hosted by the Instructors Conference. If you're looking to get members or Instructor's complainant with NFPA1403 this will be a great opportunity.

MPTC will be offering a Haz/Mat Technician class early next year for those looking to join the County Haz/Mat team

We will be hosting a RIT class in March 5th, in Slinger. If you haven't sent any members in the past few years, you should consider it. Saving our own should be top priority in our training.

Also, remember the clean helmet campaign, it will benefit all of us if we don't have to second guess ourselves on calls questioning who is qualified.

If anyone is interested in joining the Badger Training Committee, please let me know, we will be meeting next Thursday in St Lawrence at 6:30.

If anyone has any suggestions as to a training prop, they would like Badgers to consider, please let us know. Also we will gladly take any suggestions on any hands on training you would like to see.
